

Dont Study In Your Room

There are plenty of places on campus in which your student can go to study. The library has the resources needed for writing papers or even just printing papers. They also have faculty there during the library hours to help students find what they may need. The library along with any study lounge is designated for this purpose and for students to utilize. Offer these things to your student as a choice!

Use All Class Materials

The professors all have different ways of distributing information of their material in class but the professors never will sell your student short in not helping to prepare the student for their graded tests or assignments. The student is given a list of what they need in order to succeed and that is exactly what they should do until they know how they are doing in the class and use their own judgment. Normally the professors use some sort of text to guide the student, notes from class or out of class, and other means of material. It is suggested that all materials are used!
